

STARC medical

- your partner for a secure future!

STARC medical GmbH

PACS für Ärzte!

The STARC medical GmbH is a unique systems vendor for archiving and communication solutions.

A one source solution for services and software, which are necessary for the communication of information - free of impediments - between and with in surgeries, clinics, hospitals and all other areas of activity. From PC applications through to the configuration of complete networks and the development of company specific solutions.

STARC medical GmbH is the brainchild of MEDISTAR Praxiscomputer GmbH and has operated independently since 2001.

Why is the use of a PACS-system profitable?

Today economical, efficient work is only achievable through the use of modern information technology, no matter whether it's in the surgery or in clinics, hospitals or any location where files, pictures, faxes and e-mails need to be stored digitally. In all cases, the effectiveness and quality of the system solutions implemented will be the deciding factor in your success and competitiveness in the market.

Optimize your day-to-day work. STARC PACS is the foundation stone upon which one may build an effective work process. An attractive modular based software service concept for digital organization, communication and archiving.

All advantages of STARC PACS at a glance

Digital Radiography

- » Connection to all „digital“ radiography systems.
- » No more laborious development of the pictures, no more use of chemicals.

- » Pictures/Recordings are more precise and deeper in contrast than those taken with conventional radiography and can be edited on the monitor.
- » Maximize your real estate dollars. Rooms/Surgery space are used more effectively, since the space for archiving and development is no longer needed.
- » Compatible with existing X-Ray equipment.

Perfect Organization

- » Fast, direct access to all documents available from all workstations, no more time-consuming searching and sorting of patient files.
- » Automatic „Optical Character Recognition“ saves tedious typing of findings.
- » Data are saved with the help of long-term filing systems which do not alter the original documents.
- » Full integratable with KIS and Patient Management Systems.

Go for the safe future!

- » Reproduction of the quality management standards that will be required by law in the future within the STARC PACS-EDV.
- » 100 percent DICOM-compliant

Office features

- » Incoming faxes and emails are linked to patient files and therefore can be worked on at each station. Conventional copy or fax machines are superfluous.
- » Virtual post organisation bans paper from your desk.

Added features

- » Simple to use graphic interface
- » Survey screen allows 72 images to be viewed simultaneously
- » Pictures can be printed with laser or color printer; existing video printers can still be used
- » Import and export of pictures in different formats (e.g. TIF, BMP, DICOM).
- » Connectivity to US equipment, endoscopes, video cameras and every kind of image producing equipment.
